HEATED UNITS

The Banquetline hot hold system is designed to hold hot food in perfect condition either in gastronorm containers or as plated meals, stacked using covers or rings. The fan assisted heating system is controllable between 65°C to 95°C.

The range provides unmatched time, energy and money saving benefits for catering operations with cleverly designed features to bulk prepare and hold large amounts of food in advance of dining. Our heated carts are built to enable food to be transported smoothly and safely from kitchen to dining area, delivering on food quality whilst maintaining long food holding abilities.
