

# Corian Colour Bands & Care Guide

Helping you easily identify your Corian colour band and care for your surface.

## Features and benefits

### NON-POROUS

When Corian® looks clean, it really is clean.

Its smooth surface does not allow liquids, dirt and stains to penetrate. Bacteria and mould have nowhere to take root.

### DURABLE

Long-lasting solution for high traffic spaces.

Homogeneous in all its thickness, robust and resistant to abuses typical of high traffic spaces.

### HYGIENIC

Contributes to hygiene and healthiness for your peace of mind.

No place for germs, bacteria and mould growth thanks to its non-porous nature and to inconspicuous seams. Marks and stains can be easily removed from the surface.

### SOFT AND WARM

Add a unique touch of sensorial performance to your design concepts.

Pleasant and smooth to the touch with its silk-like surface adapting itself to the climate of interior environments: beautiful and relaxing, for homes and public spaces.

### THERMOFORMABLE

It can be shaped to meet any design and style requirement.

It can be moulded into 2D and 3D shapes meeting all design goals and fitting any available space. No limits to the creativity for your projects.

### BACKLIGHTING

Play with light to create fascinating translucency effects.

The translucency of many colours, combined with design versatility, enables the creation of fascinating installations featuring unique lighting effects.

### REPAIRABLE

If needed, it can be easily repaired and brought back to its original look.

It withstands daily wear and tear, keeping its original look for many years. Scratches, chips and more serious damages can be easily mended on the spot, always without a trace.

### SEAMLESS

The surface continuity simplifies cleaning, sanitising and routine maintenance.

It enables the seamless integration of multiple elements, enabling large installations featuring a fascinating monolithic look.

### LOW VOC

For environments with minimum impact on human health.

Corian® Solid Surface is free from dangerous chemicals and hence supports better indoor air quality.

### RECYCLED CONTENT

For environments with minimum impact on human health.

A selection of our colours contains between 6% and 14% of recycled material and our (North American) manufacturing facilities are zero waste to landfill.

# KEY

## DESCRIPTION

## KEY CODE

Kitchen use (only less noticable marks may appear and be visible under specific lighting conditions)

K

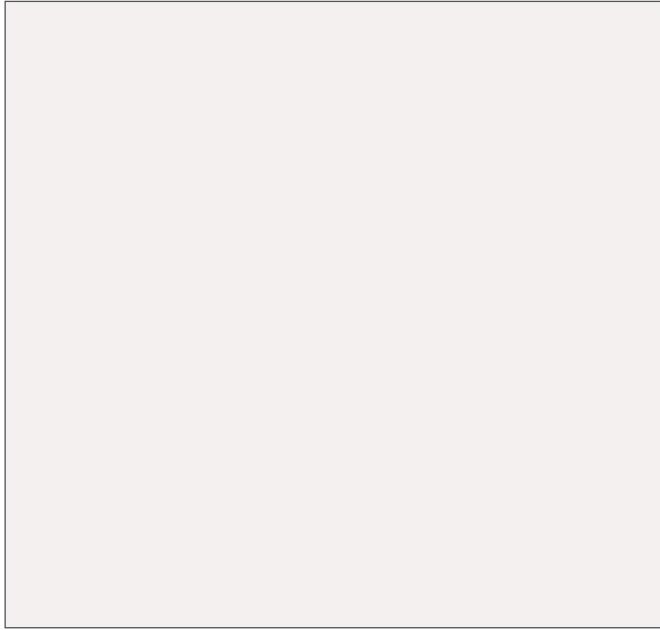

Transparent (can be used with a backlighting system for a premium lit look)

T

Recycled waste (contains recycled content, pending SCS certification. These colours have been certified by SCS Global Services to have one of three minimum levels of pre-consumer recycled material: 6%, 10%, or 14%)

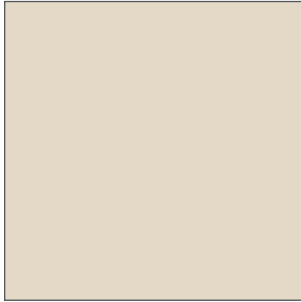

R

# BAND 0

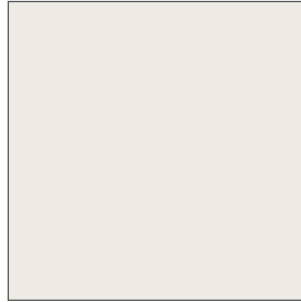

Glacier White (K)

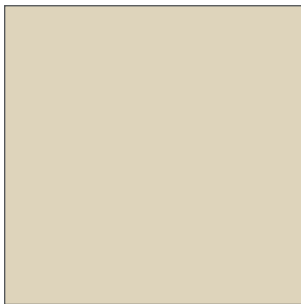

# BAND 1

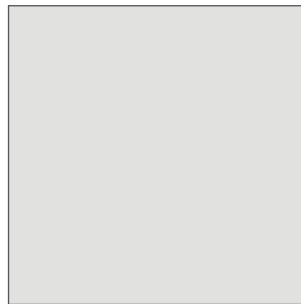

Bisque (K)

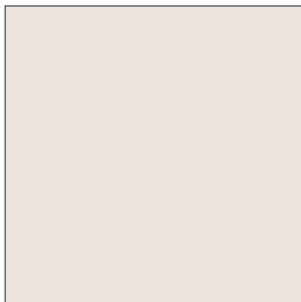

Glacier Ice (T)

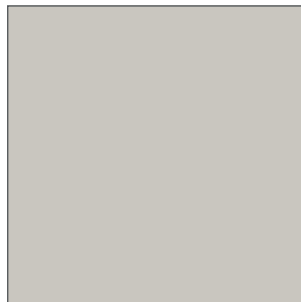

Bone (K)

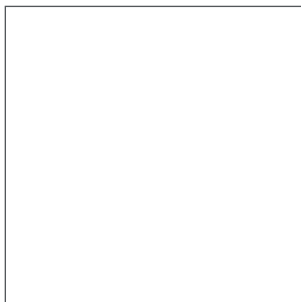

Light Ash (K)

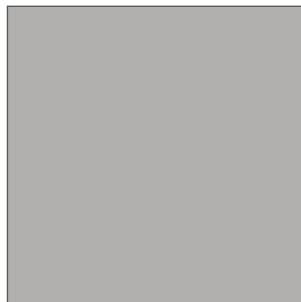

Cameo White (K)

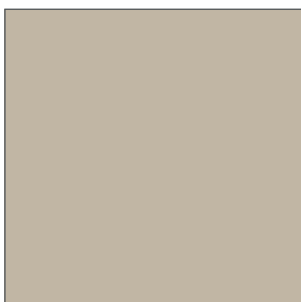

Pearl Grey (K)

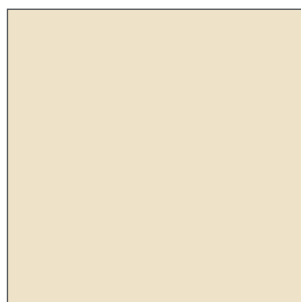

Designer White (K)

Silver Grey (K)

Elegant Grey (K)

Vanilla (K)

# BAND 2

Artista Beige (R)

Artista Sage (K, R)

Artista Canvas (K, R)

# Corian scratch susceptibility

*Caring for your Corian surface*

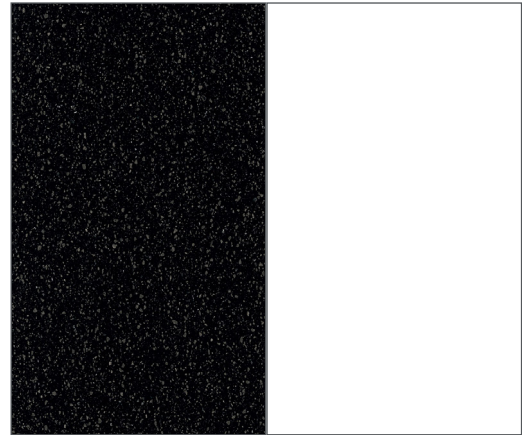

## VULNERABILITY:

Corian is made from natural minerals and acrylic polymer, which makes it softer than quartz or granite. Dropping or dragging sharp, heavy, or rough objects across the surface can cause scratches or scuffs.

## FINISH MATTERS:

Scratches are more visible on certain types of Corian finishes. Dark glossy colours show scratches and wear more easily.

Lighter, textured or matte colours are more forgiving and better at concealing minor scratches and scuffs.

Darker, glossy  
colour example  
(Deep Night Sky)

Lighter, matte  
colour example  
(Venaro White)

## RENEWABLE:

The good news is that Corian is renewable! Corian's colour runs all the way through the material, making it entirely renewable. This is a significant advantage as it means that most scratches, scuffs, and even more significant damage can be sanded or polished out.

For more information please refer to the [Corian Use & Care page](#).

## CARE TIPS

- Never cut or chop on Corian, use a chopping board instead. Cutting directly on Corian will score the work surface!
- Never put hot pans, particularly cast iron, directly on a Corian top or in a sink as such heat can damage any surface.

Like any surface Corian will develop slight abrasion marks in normal daily use but following these care tips will help to protect it.
