MAXILINE ECO+ REFRIGERATED MULTI-DECK DISPLAYS

The ECO+ range consists of highly efficient, stand-alone food and beverage display units tailored to meet the needs of high volume food and beverage businesses.

This adaptable range enables the attractive display of chilled products while ensuring precise core product temperatures are maintained.

Ideal for delis, coffee shops, convenience stores, and various food-to-go setups.

Product features

- LED illumination under each shelf and side wall
- Four adjustable height shelves can be positioned flat or inclined
- Complete with shelf edge ticket strips
- All units operates from a single 13 Amp plug
- Temperature range -1°C to 5°C

MAKING THE DIFFERENCE

A new energy-saving function activates internal boil-off elements only when needed, rather than running continuous.

An energy-saving solution that turns off the under shelf lighting when there are no customers present.

This technology automates condenser cleaning to minimise engineer call-outs and prevent downtime.

Evaporator fan technology adjusts fridge system duty based on real-time environment.
