WARRANTY POLICY

WARRANTY PERIOD

All Victor catering equipment supplied to the United Kingdom mainland is guaranteed against defective workmanship, faulty components and materials for a period of 12 or 24 months from the point of installation.

INSTALLATION

All Victor catering equipment must be installed by a suitable qualified contractor. Faults arising out of incorrect installation are not covered by this product warranty.

AUTHORISED WARRANTY

Victor Manufacturing must authorise all warranty repairs prior to commencement of work. Work carried out on equipment without authorisation will not be covered under warranty nor will any resultant damage.

SITE ACCESS

Warranty repairs are carried out between 8.00 a.m. and 5.00 p.m. on weekdays by prior arrangement. The customer must ensure that the engineer has access to the product at the time arranged.

MAINTENANCE

Warranty does not cover routine maintenance or cleaning, however, users are advised that routine maintenance must be carried out in accordance with our instructions. This is of particular importance with refrigeration and gas fuelled appliances. Work made necessary by lack of routine maintenance or cleaning is not covered by this warranty and will be charged.

IMPROPER USE

This warranty does not cover customer misuse or abuse resulting in broken components or damaged equipment. Some parts will not automatically be covered by this warranty (e.g. panels, glass, lamps, shelves, etc.). It should be noted that many surface finishes including paint, plastic coated steel, chrome and gold plating can be scratched and damaged if not properly cared for; such damage is not covered by this warranty.

The user must ensure that people using equipment are adequately trained.

REFRIGERATION

It is important to note that warranty cover on refrigerated products is dependent upon the conditions in which the product is situated, which must fall within the temperature and relative humidity levels laid down in the product specification. It is the responsibility of the customer to ensure that working conditions are suitable.

Work carried out on equipment which does not fall within the scope of this warranty will be chargeable.

Hot Cupboards - General Purpose

Stainless steel construction, all models operate from a single 13 amp supply and are supplied complete with two wire shelves & digital temperature display. Mobile units, fitted with 100mm swivel castors, 2 braked, length includes push bar.

Static units available on height adjustable legs at no additional cost, specify **Static** at time of order. These units are supplied without push bar, as such the length of the unit is reduced by 65mm.

Buffet/Carvery hot cupboard

Features a heated plate dispenser, hot cupboard, and wet or dry heat Bain Marie well accommodating two rows of GN1/1 gastronorm containers or equivalent. Compatible with carvery pads, tiled inserts, or gastronorm containers to create a flexible carvery or self-service buffet solution. Available in left-hand (L) and right-hand (R) models, identified by the position of the plate dispenser when viewed from the chef's side. Price includes a curved glass quartz heated gantry with two rows of heat lamps directed to the front and rear of the countertop.

Victor Caribbean blown air refrigerated wells and deck are designed to meet the EN ISO 23953 standard and provide M1 Cabinet Class conditions (nominally 3°C core product temperature) exceeding the Climate Class 3 environment of 25°C in 60% RH. In use these units will maintain the product core temperature of pre chilled food below 5°C in ambient temperatures up to 27°C - 50% relative humidity. All units have self evaporating condense systems.

Multi-tier - open fronted display

Refrigerated display - Meets EN ISO 23953 standard, providing M1 cabinet class conditions in climate class 3 of 25°C at 60% RH. Options of two or three shelf models, counter versions with rear opening doors or solid back wall models.

This collar is not suitable if drop-in is flush fitted in counter top.
Topper base
Allows heated Synergy drop-in to be used as a table top unit (Ceramic hotplates and 65mm deep Bains Maries only).

DHTB1	Topper base heated GN1 size	£240
DHTB2	Topper base heated GN2 size	£260
DHTB3	Topper base heated GN3 size	£295
DHTB4	Topper base heated GN4 size	£325

Refrigerated units - Curved glass

Designed to meet the EN ISO 23953 standard and provide M1 Cabinet Class conditions exceeding the Climate Class 3 environment of 25°C in 60% RH. In use Victor refrigerated Synergy units will maintain the product core temperature of pre chilled food below 5°C in ambient temperatures up to 27°C - 50% relative humidity. Synergy units are illuminated using LED lamps. All controls are mounted on the unit. Removable fascia grills are provided for mounting on the counter front to allow air intake and to facilitate cleaning. All units have self evaporating condense systems.

Refrigerated blown air deck

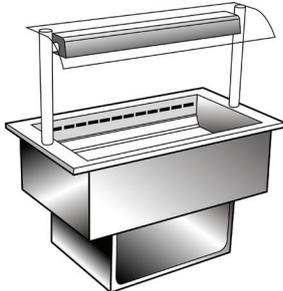

Refrigerated units can be supplied without compressors for remote refrigeration at a reduction of £515 per unit

Victor Synergy units are supplied with an integral telescopic baffling and air duct system arrangement to facilitate various venting configurations. The majority can be achieved without pre-specifying, but if it is envisaged that a refrigerated unit will be installed without access to the front of the refrigeration housing, (e.g. behind a dwarf wall), please contact our sales department to ensure that the correct unit is supplied.

BMCV1	Carvery insert/gravy dish for BM GN1/1 size	£300
BMCV2	Carvery insert full size for BM GN1/1 size	£250
DHCP1	Ceramic insert GN1/1 size	£325
DHTP1	Tiled insert GN1/1 size	£355
BMCV3	Carvery insert & Cradle Collar for DHHP units	£260

This collar is not suitable if drop-in is flush fitted in counter top.

Topper base

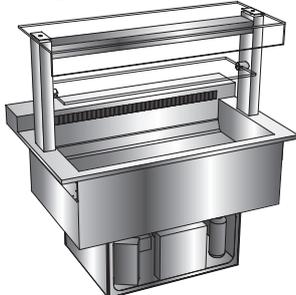

Allows heated Synergy drop-in to be used as a table top unit (Ceramic hotplates and 65mm deep bain maries only).

DHTB1	Topper base heated GN1 size	£240
DHTB2	Topper base heated GN2 size	£260
DHTB3	Topper base heated GN3 size	£295
DHTB4	Topper base heated GN4 size	£325

Refrigerated units - Flat glass

Designed to meet the EN ISO 23953 standard and provide M1 Cabinet Class conditions exceeding the Climate Class 3 environment of 25°C in 60% RH. In use Victor refrigerated Synergy units will maintain the product core temperature of pre chilled food below 5°C in ambient temperatures up to 27°C - 50% relative humidity. Synergy units are illuminated using LED lamps. All controls are mounted on the unit. Removable fascia grills are provided for mounting on the counter front to allow air intake and to facilitate cleaning. All units have self evaporating condense systems.

Refrigerated blown air deck

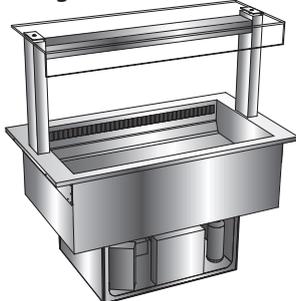

Refrigerated units can be supplied without compressors for remote refrigeration at a reduction of £515 per unit

GN1/1 Capacity	Part Number	Top size (mm)	Power (kW)	Cut out (mm)	Price £

Victor Synergy units are supplied with an integral telescopic baffling and air duct system arrangement to facilitate various venting configurations. The majority can be achieved without pre-specifying, but if it is envisaged that a refrigerated unit will be installed without access to the front of the refrigeration housing, (e.g. behind a dwarf wall), please contact our sales department to ensure that the correct unit is supplied.

Heated units without gantries

Ceramic and Bain Marie units can be supplied without the superstructure. These come complete with 1.5 metres of cable and an energy regulator (supplied loose) for mounting into a suitable control panel.

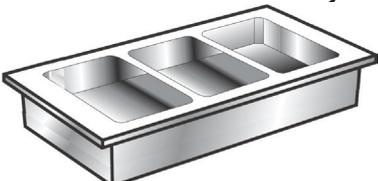

An alternative Synergy control box can be supplied as an optional extra.
