## WARRANTY POLICY

### WARRANTY PERIOD

All Victor catering equipment supplied to the United Kingdom mainland is guaranteed against defective workmanship, faulty components and materials for a period of 12 or 24 months from the point of installation.

### INSTALLATION

All Victor catering equipment must be installed by a suitable qualified contractor. Faults arising out of incorrect installation are not covered by this product warranty.

### AUTHORISED WARRANTY

Victor Manufacturing must authorise all warranty repairs prior to commencement of work. Work carried out on equipment without authorisation will not be covered under warranty nor will any resultant damage.

### SITE ACCESS

Warranty repairs are carried out between 8.00 a.m. and 5.00 p.m. on weekdays by prior arrangement. The customer must ensure that the engineer has access to the product at the time arranged.

### MAINTENANCE

Warranty does not cover routine maintenance or cleaning, however, users are advised that routine maintenance must be carried out in accordance with our instructions. This is of particular importance with refrigeration and gas fuelled appliances. Work made necessary by lack of routine maintenance or cleaning is not covered by this warranty and will be charged.

### IMPROPER USE

This warranty does not cover customer misuse or abuse resulting in broken components or damaged equipment. Some parts will not automatically be covered by this warranty (e.g. panels, glass, lamps, shelves, etc.). It should be noted that many surface finishes including paint, plastic coated steel, chrome and gold plating can be scratched and damaged if not properly cared for; such damage is not covered by this warranty.

The user must ensure that people using equipment are adequately trained.

### REFRIGERATION

It is important to note that warranty cover on refrigerated products is dependent upon the conditions in which the product is situated, which must fall within the temperature and relative humidity levels laid down in the product specification. It is the responsibility of the customer to ensure that working conditions are suitable.

Work carried out on equipment which does not fall within the scope of this warranty will be chargeable.

## Hot Cupboards - General Purpose

Stainless steel construction, all models operate from a single 13 amp supply and are supplied complete with two wire shelves & digital temperature display. Mobile units, fitted with 100mm swivel castors, 2 braked, length includes push bar.

Static units available on height adjustable legs at no additional cost, specify **Static** at time of order. These units are supplied without push bar, as such the length of the unit is reduced by 65mm.

**Banquetline - Heated units**

Constructed from stainless steel with robust all-round bumper, strong door latches and strong adjustable hinges. All units are mounted on 150mm heavy duty castors as standard with 2 braked. All units operate from a 13 amp supply. Heated units are factory set at 85°C, operator adjustable between 65°C and 95°C and are complete with a digital temperature read-out on the microprocessor control. Combination units require eutectic plates, not included in the price.

**Banquetline 30**

*Supplied with 2 shelves & supports and one push bar. Push bar adds 80mm to depth.*

## Buffet/Carvery hot cupboard

Features a heated plate dispenser, hot cupboard, and wet or dry heat Bain Marie well accommodating two rows of GN1/1 gastronorm containers or equivalent. Compatible with carvery pads, tiled inserts, or gastronorm containers to create a flexible carvery or self-service buffet solution. Available in left-hand (L) and right-hand (R) models, identified by the position of the plate dispenser when viewed from the chef's side. Price includes a curved glass quartz heated gantry with two rows of heat lamps directed to the front and rear of the countertop.

Victor Caribbean blown air refrigerated wells and deck are designed to meet the EN ISO 23953 standard and provide M1 Cabinet Class conditions (nominally 3°C core product temperature) exceeding the Climate Class 3 environment of 25°C in 60% RH. In use these units will maintain the product core temperature of pre chilled food below 5°C in ambient temperatures up to 27°C - 50% relative humidity. All units have self evaporating condense systems.

### Multi-tier - open fronted display

Refrigerated display - Meets EN ISO 23953 standard, providing M1 cabinet class conditions in climate class 3 of 25°C at 60% RH. Options of two or three shelf models, counter versions with rear opening doors or solid back wall models.

Victor Synergy units are supplied with an integral telescopic baffling and air duct system arrangement to facilitate various venting configurations. The majority can be achieved without pre-specifying, but if it is envisaged that a refrigerated unit will be installed without access to the front of the refrigeration housing, (e.g. behind a dwarf wall), please contact our sales department to ensure that the correct unit is supplied.

**Heated units without gantries**

Ceramic and Bain Marie units can be supplied without the superstructure. These come complete with 1.5 metres of cable and an energy regulator (supplied loose) for mounting into a suitable control panel.

An alternative Synergy control box can be supplied as an optional extra.

**Heated Bains Marie - Dry heat 65mm deep well**
